Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Newly submitted claims 27-33 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claims 27-33 are directed to the method for mounting a housing assembly which is a method of use classified in class 29, subclass 700, while original but cancelled claims 1-2 and newly added claims 3-26 are directed to the mounting assembly which is an article claim classified in class 248, subclass 27.3. The inventions are distinct, each from the other because of the following reasons:

Inventions of the article claims and method claims above are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product such as a leaf spring attached to the sides of the housing for insertion into an opening.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for

Art Unit: 3632

prosecution on the merits. Accordingly, claims 27-33 have been withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

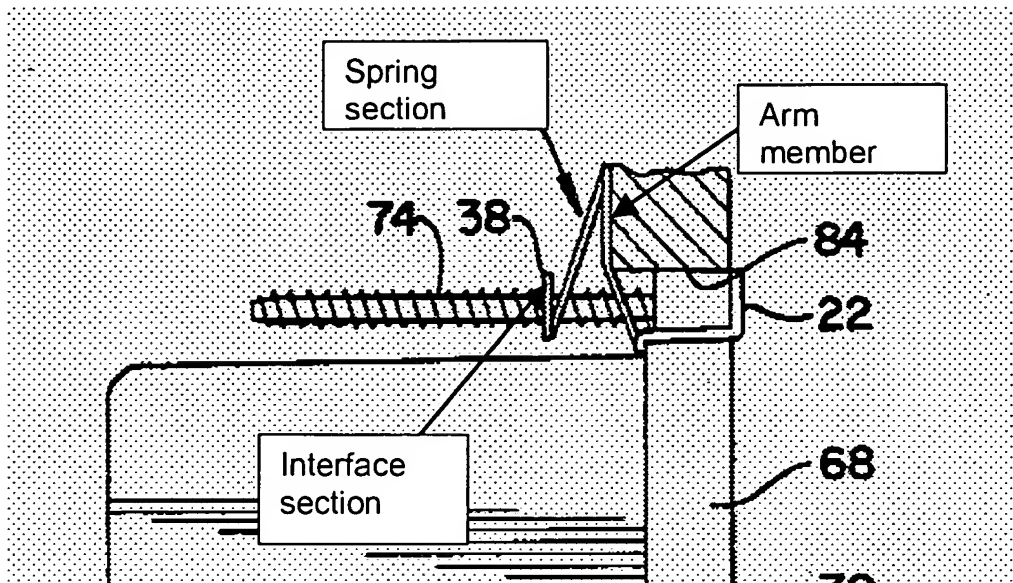

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

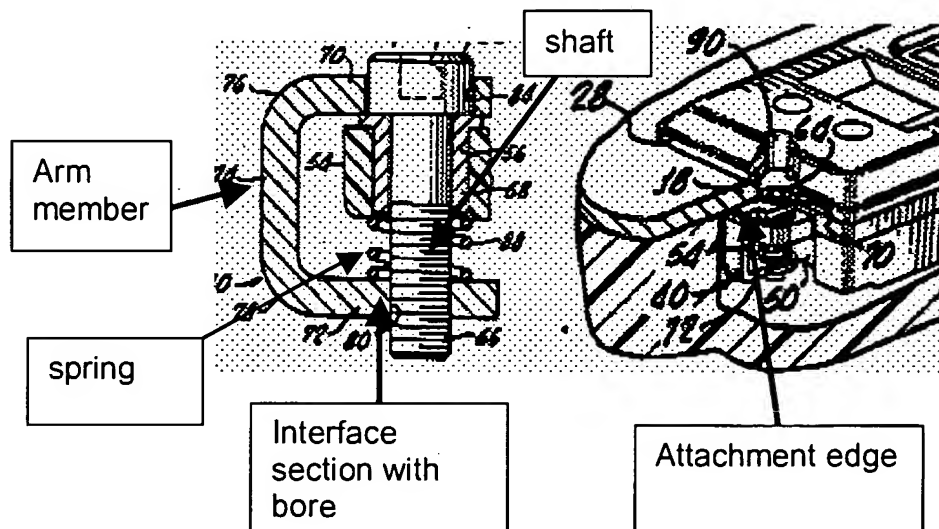

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

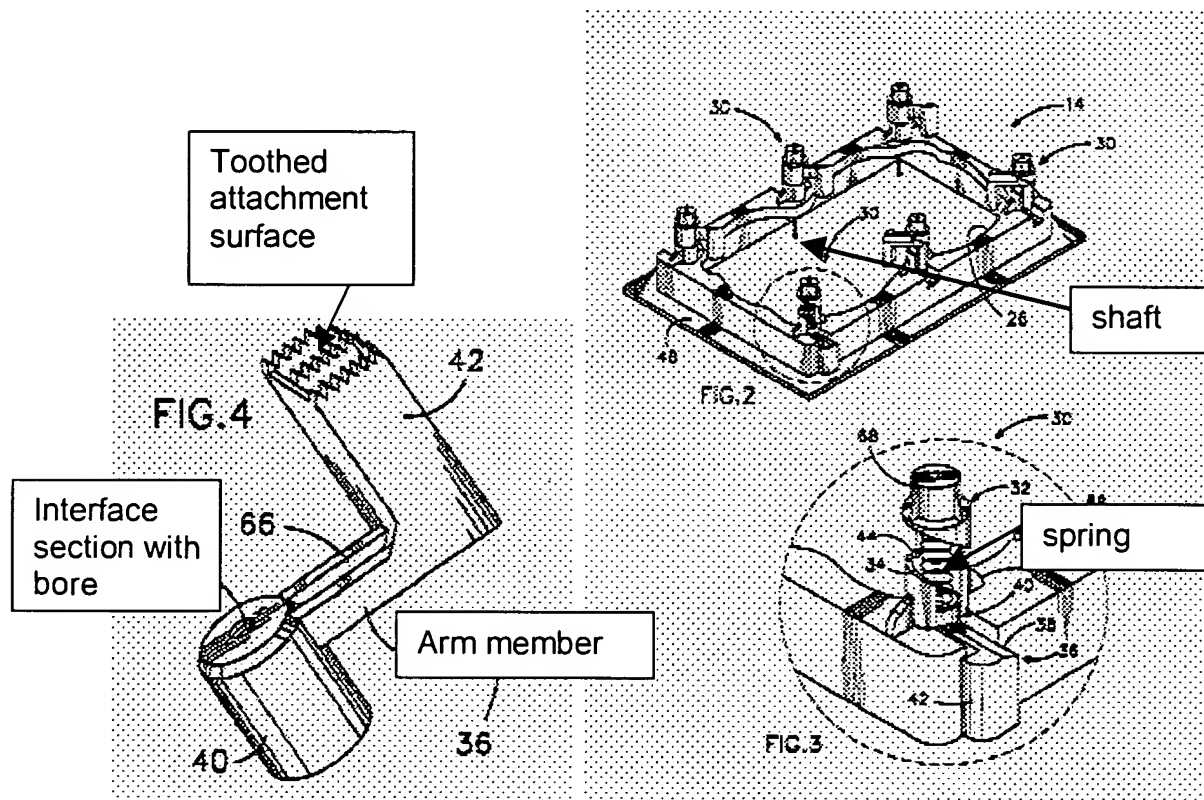

Claims 3-23, 25, and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Suk (US patent no. 4,120,473). Suk disclosed all the claimed features of applicant's invention (see illustration below). Suk further shows a spring section interconnect the arm with the interface section (38) with bore (40) receiving shaft (74) wherein the arm is pivotally coupled to the interface section via the spring section (where pivot axis is through page) and wherein the attachment edge is toothed surface (48, figure 5).

Claims 13-21, 23, and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Stange et al (US patent no. 5,374,103). Stange disclosed all the claimed features of applicant's invention (see illustration below).

Claims 13-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Tchilinguirian (US patent no. 6,588,543). Tchilinguirian disclosed a speaker housing (48) with all the claimed features of applicant's invention (see illustration below).

Response to Arguments

Applicant's arguments with respect to claims 3-33 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3632

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
